performance logic

Integrated Audit and Corrective Actions Software

Performance Logic's comprehensive software platform provides a 360° view of the performance improvement and corrective action planning and management process. Use it to capture audit and survey data, seamlessly integrate it with our analytical tools to identify improvement opportunities, and implement successful performance improvement projects and corrective action plans.

AUDITS

- Custom audit workflow from setup to execution
- Configurable audit templates including question types and checklists
- Intuitive webforms for audit completion
- Automated notifications and reminders
- Real-time data summary, analysis, and status reporting

PERFORMANCE TRACKING AND ANALYSIS

- System, facility, and department level scorecards
- Shared measures across scorecards and projects
- Measure comparison and analysis
- Connectivity with other dashboard platforms for data management

CORRECTIVE ACTION PLANNING

- Configurable workflow for corrective action requests and approval
- Standardized templates to ensure compliance
- Real-time validation of action items
- Status dashboards with drill-down capability

REPORTING

- Standard reporting for system, facility, and department level tracking
- Ad-hoc cross-sectional filtering available
- Custom project and portfolio reporting
- Automated scheduled reports
- Email and export capabilities for all reports

CORRECTIVE ACTION MANAGEMENT

- Intuitive workflow for managing corrective actions
- Prepopulated custom and standard templates including PDSA and A3
- KPI tracking and integration
- Assignment tracking and notifications
- Ad-hoc and scheduled reminders
